Dear Sir or Madam:

Following an audit of my CD collection, and based on information obtained from Hyperion Records, among other sources, I have compiled a list of defective discs from my CD collection that are currently "bronzing". I have found 124 releases, comprised of 131 individual discs, to be experiencing this problem. A simple listing of the affected CDs is included below. On following pages, I have included the same list in various formats that may facilitate identification on your end.
